

Craftex Product Specification Sheet

SWEEPEX 65:1000 Hybrid

The Sweepex 65:100 Hybrid is a ride on machine designed to meet different cleaning needs with great productivity.

Suitable for both outdoor and indoor spaces, this unit guarantees excellent cleaning results even on carpeted areas. The new design on this gasoline/battery unit combination increases machine comfort and manoeuvrability whilst in use, allowing the operator to work easily in medium sized areas. While seated the user can feel a full control over the machine, thanks to both the complete visibility of the working and manoeuvring area, and due to the innovative steering wheel with integrated controls. The activation of the machine functions are more intuitive, and without distraction.
