

# Craftex Product Specification Sheet

## STEAMEX SD4

The SD4 is a commercial chewing gum removal system incorporating an (up to) 4.5 bar pressure steam boiler with an integral chemical delivery system.

Made from highly durable stainless steel construction, the unit features a continuous fill boiler system allowing refill at any time during operation.

The SD4 is an ideal machine for low-level gum-removal applications, and can be used in environments such as:

- Shopping centres
- Sports stadiums
- Schools
- Local authority concerns

The SD4 has an integral detergent tank and a steam regulator to control the volume of steam. Machine comes complete with a full steam and detergent tool kit as standard.

### Steam Pressure

4.5 bar
