

Craftex Product Specification Sheet

SWEEPEX 4:380B

A twin force, mini multifunction vacuum sweeper for hard floors and carpets.

The Sweepex 4-380B combines the mechanical strength of two high speed counter-rotating rollers "twin force", which rotate at 2000 RPM, providing suction over the entire sweeping width. Rotafil designed, for this machine, a new high-efficiency suction motor with an integrated drive system for the two brush-rollers. The patented drive system with Poli-V / cogged drive belts, allows the counter rotation of the brush-rollers to provide ultimate quietness and maximum reliability. The swivel joint provides a precise steering effect.

Energy consumption is extremely low; only 270W. The machine is very quiet and extremely maneuverable. It's two counter rotating brush-rollers collect any debris up to 10mm size. The suction is very strong over the entire sweeping width thanks to the high- efficiency Rotafil suction motor.

Working width, vacuum

380mm

Working width, brush

350mm

Brushes

2 x 2000rpm

Filter bag capacity

4L

Battery specification

Li-Ion, 36V - 6Ah

Run Time (hard floors)

50 mins

Run Time (carpet)

40 mins

Battery recharging

90 mins

Brush Motor

270W

Vacuum / Water lift

650mm/H2O

Noise Level

65.3 db(A)

Machine Weight (inc. batt.)

7.6kg

Machine Size

380 x 440 x 140 mm

SWEEPEX 4:380B

Ideal for any floor

The machine runs smoothly on 4 anti-scratch rubber wheels. The central wheels are pivoting allowing incredible maneuverability. The swivel joint provides a precise steering effect. The machine is perfectly at ease on rough or polished floors even with wide and deep joints. This machine provides the perfect combination of mechanical action and suction with sealed filtration.

Incredible efficiency on carpets

It is the ideal tool for low-pile carpets and rugs. Double mechanical action (twin force) and suction allow the deep cleaning of carpets equally as well as the other professional vacuums.

Adjustable Flap

To obtain the maximum suction together with the maximum capacity to collect large size debris, we have patented an adjustable front flap to adapt the machine to any requirement. The collection filter bag has an opening as wide as the brushes themselves thereby providing less possibility of obstruction.

SWEEPEX 4:380B

Dry Cleaning System / Encapsulation

In seconds and with no tools, the Dry Cleaning System converter (optional) can be installed to convert this machine into a very effective Low Moisture Carpet Cleaner thanks to the mechanical action of the two high speed counter-rotating brush rollers.

Easy Maintenance

No tools are required to replace the brush-rollers, to clean the brush area or to replace the filters. The brush-rollers are dynamically balanced and rotate at 2000 and 2200 RPM respectively for versions L-ion and Electric. The brush supports are metal with sealed ball bearings.

Li-ion Batteries

The capacity is extremely high: 36V-6Ah allowing it to work continuously and effectively for 50 minutes on floors and about 40 minutes on low pile carpet. The replacement of the battery takes seconds with no tools, in this regard the user can easily extend runtime with a second (optional) battery. The total recharging time is very short: only 90 minutes. The batteries are for professional use and have a lifetime of approximately 800 charging cycles.
