

# Craftex Product Specification Sheet

## SCRUBEX 7:330B

The Scrubex 7:330B is a unique cylinder scrubber drier featuring a compact design, peerless performance, user friendly controls and a innovative battery system.

### Tank Capacity

7.5 litres

### Cleaning Width

330mm

### Squeegee Width

420mm

### Power Supply

Battery 24V

### Rated Power

270W

### Performance

835m<sup>2</sup>/hour

### Run Time

1 hour

(2 hour option available)

### Run Time

2 hours

(4 hours)

### Noise Level

58/54db(A)

### Weight (exc. batteries)

23kg

### Dimensions

640 x 450 x 422mm

# SCRUBEX 7:330B

## Compact Design

This machine is ideal for narrow spaces, and can access areas where no other scrubber dryer can operate. The ergonomic handle is foldable allowing cleaning underneath obstacles such as chairs and tables.

## Peerless Performance

The brush head and squeegee system perfectly optimize cleaning and drying performance with amazing results, making Scrubex 7:330B the ideal solution for small or crowded cleaning areas.

The cylindrical brush deck ensures the best cleaning performance on every kind of floor, including uneven surfaces – simply adjust the downward pressure accordingly.

The alternate twin squeegee system works by closing the front squeegee when operating in a forwards motion, allowing the rear one to work more efficiently, and the opposite applies when moving backwards. This ensures ultimate drying results in both directions.

Both squeegee arms retract inside the brush head when coming into contact with any obstacles, and extend out again when the obstacle has been passed. This allows maximum agility when working.

Select the silent mode function on the control panel and the Scrubex 7:330B immediately quietsens to 54dbA. This is ideal for day cleaning and in environments where noise needs to be kept to a minimum.

# SCRUBEX 7:330B

## User Friendly Controls

All the main working functions can be selected and managed directly from the intuitive control panel. Use the One Touch Button to activate all the Scrubex 7:330B's functions together by default. This is a start and go machine, immediately ready for use, with little training required.

## Innovative Battery System

The Scrubex 7:330B hosts the latest generation powerful batteries inside a case. The lithium batteries are selected for their durability and last for more than 1000 charging cycles. They can be recharged as and when required (even partially) without any risk of damage. The runtime is 1 hour as standard, with a 2 hour runtime option also available. Weighing only 3.5kg, and contained in a practical case, the Scrubex 7:330B batteries are easily transported and can be installed by anybody.

The Scrubex 7:330B can also be provided with a 230V power supply, allowing this machine to be used with a cable for unlimited runtime.

Ergonomic, patented handle with integrated unlocking system, for an easy cleaning under chairs and tables etc.

Combined brush head and squeegee system incorporating a cylinder-brush with adjustable brush pressure and a twin squeegee with alternating suction system (patented).

Rear pivoting wheels for maximum manoeuvrability and control.

# SCRUBEX 7:330B

## Compatible in many environments

Compact and responsive, the Scrubex 7:330B works effectively in every environment. The machines size, combined with the new unlocking handle system, guarantee the best cleaning results, even in congested areas and in narrow spaces. The rear swivel wheels assure the maximum manoeuvrability.

## User friendly

The Scrubex 7:330B is easy to set up and control from the intuitive control panel. Blue coloured parts on the machine clearly indicate where the user can 'put the hands' when preparing the machine for work or while using it.

## Innovative battery system

Power in a case! The powerful lithium batteries for the Scrubex 7:330B stay inside a practical case which can be promptly inserted in the back of the machine. Nothing to extract, remove or prepare. Weighing only 3.5kg these batteries have a 1 hours runtime. A 2 hour runtime option is also available.

## Easy to fill & drain

The solution tank of the Scrubex 7:330B is easy to transport and fill (under sink/tap) and has a practical cover with percentage graduation for chemical dosage. The recovery tank is removable, and completely sealed, thanks to the click system. This ensures no fluid is spilt either in transport or whilst the user is operating the machine. The tank can be easily transported and drained like a bucket.

## Effortless maintenance

The Scrubex 7:330B has several features to ensure ease of maintenance of the machine. These include a quick release system for the machine brush (operated by button) and a sliding brush deck. Squeegee blades are simple to install/remove.

## Easy to transport, park & store

At only 23kg, and with the foldable handle, the Scrubex 7:330B can be moved, parked or stored in most areas with minimal effort.

## Extensive accessories range

There is a large range of accessories available to use with the Scrubex 7:330B including brushes, blades, chargers and batteries.
